GIS kao alat za suradnju

Geoportali

The screenshot displays the 'Geoportal GSS-a' web application. The browser address bar shows 'hgss.prenhit.hr:8080/hgss/'. The page features a main map area showing Zagreb, Croatia, with various geographical features and infrastructure. On the left, a 'Slojevi' (Layers) panel lists several map layers: 'Pozadinski sloj' (Background layer) with 'OpenStreetMap' and 'OpenCycleMap' options, 'Google', 'DGU', and 'Slojevi' (Layers) with 'POI', 'Staze' (Trails), 'Domovi' (Homes), 'Idi na koordinate' (Go to coordinates), 'Planer putovanja' (Travel planner), 'Točke Starta/Cilja' (Start/End points), and 'Ruta' (Route). The 'Info' panel at the bottom left shows 'Terms of Use' and 'Pogled' (View). The 'Pregledna karta' (Overview map) panel at the bottom right shows a smaller map of the same area. The 'Sadržaj' (Content) panel in the center lists 'Digitalna ortofoto karta' (Digital orthophoto map) with 'DOF5' and 'DOF5 - podjela na listove' (DOF5 - division into sheets) options, and 'Hrvatska osnovna karta' (Croatian basic map) with 'HOK5' and 'HOK5 - podjela na listove' options. The 'Pretraga' (Search) panel is also visible. The bottom of the page includes the 'REPUBLIKA HRVATSKA DRŽAVNA GEODETSKA UPRAVA' logo, the 'DGU' logo, and the text 'Optimizirano za: Firefox, Chrome, Opera, Safari, IE7+' and '©2012 Državna geodetska uprava'.

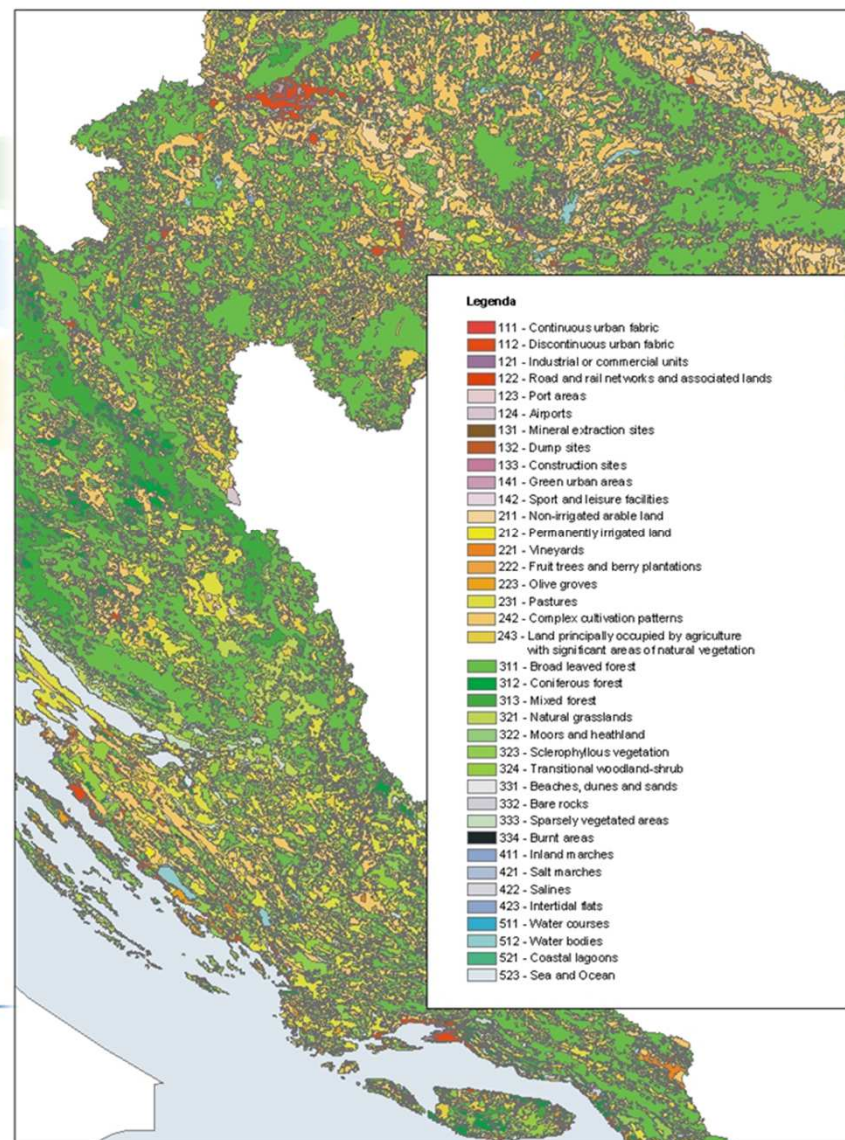

CLC baza

- mjerilo kartiranja – 1 : 100 000
- najmanja površina koja se kartira- 25 ha
- minimalna širina kartiranja – 100m
- Osnova satelitski snimci
LANDSAT rezolucije 30 m

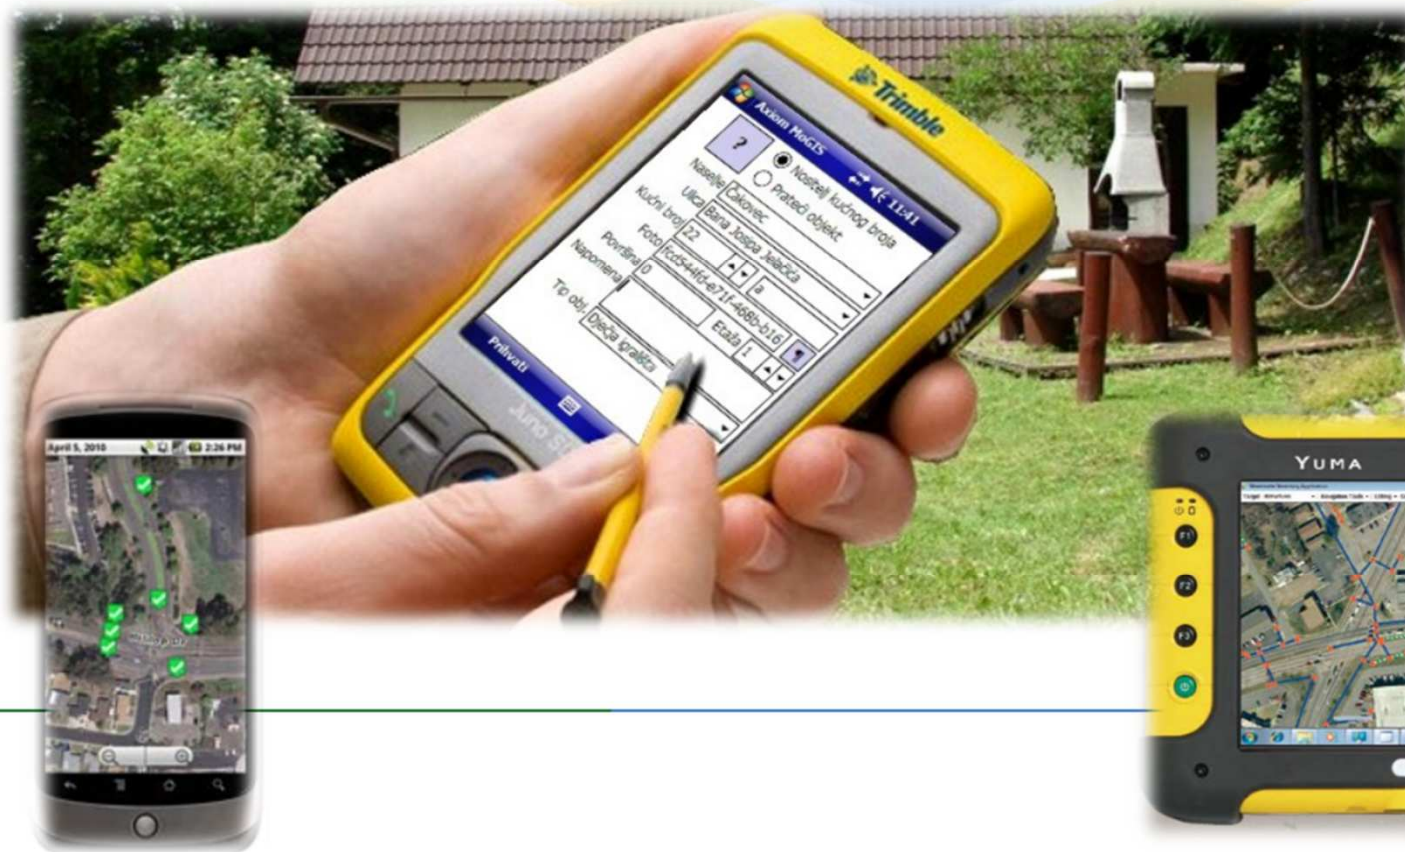

Corine

- pokrov zemljišta se razvrstava u 44 klase na 3 razine
- U Hrvatskoj je detektirano 38 klasa
- Baza promjena min površina 5 ha

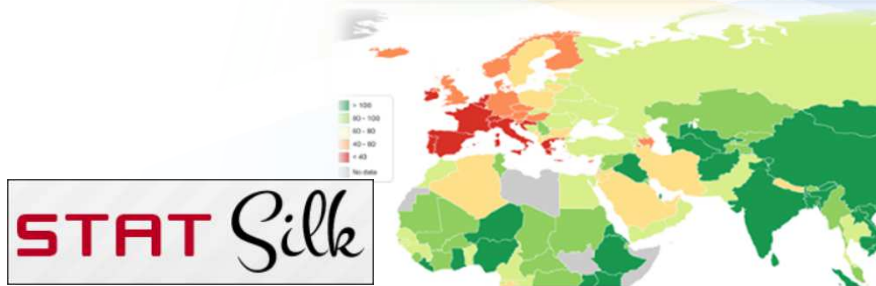

Mobilni uređaji

- Prikupljanje podataka na terenu

Metapodaci

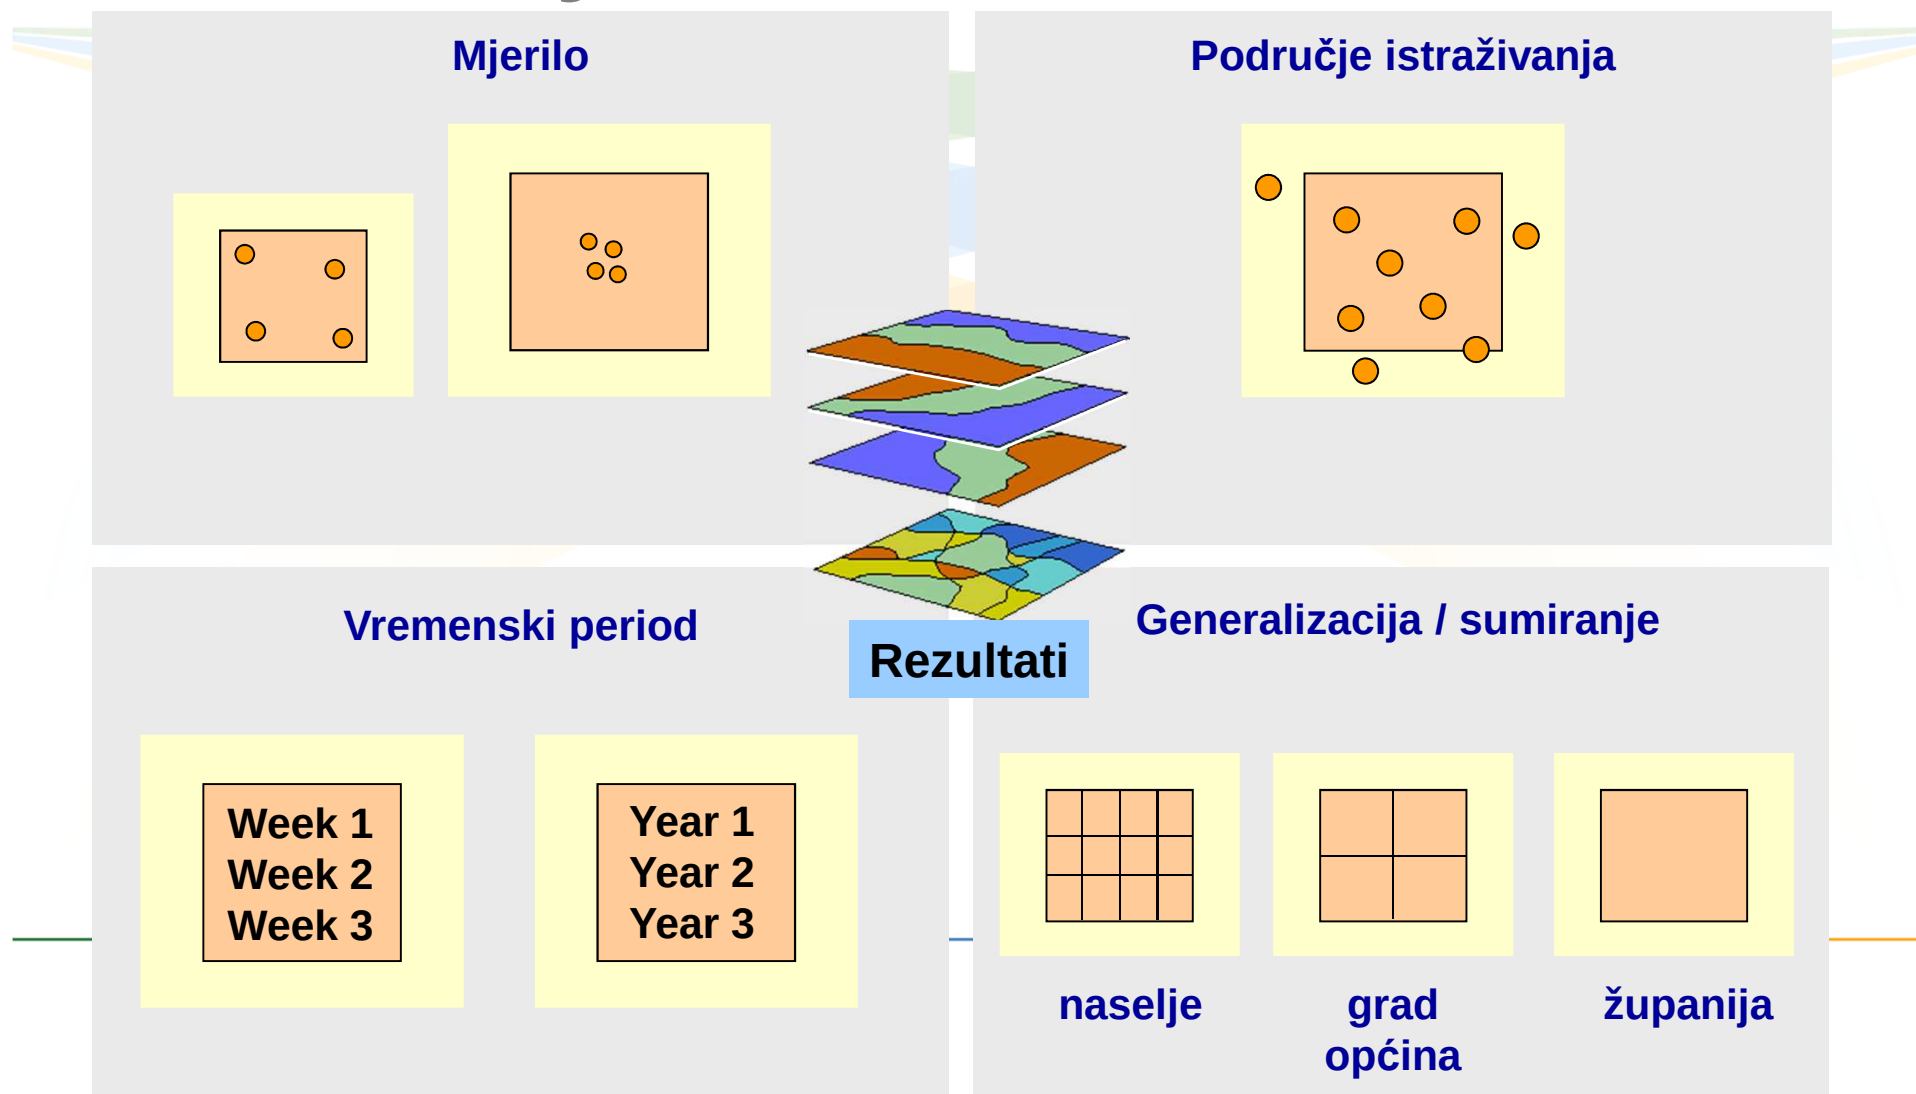

Načini razmjene podataka

- Datoteke (FTP, CD/DVD, USB, HardDisk)
- WMS
- WFS
- Papirnati izvještaji
- Excel izvještaji
- PDF izvještaji
- Izvještaji
- Izvještaji

Što sve utječe na rezultate GIS analize?

Problem promjenjivih jedinica teritorija

- Zonalni efekt:
 - Slična veličina jedinica, ali različite granice
 - Naselja, Kat. općine i Poštanski uredi
- Efekt mjerila:
 - Povećanje veličine teritorija i smanjenje broja teritorijalnih jedinica
 - Općine > Županije > Regije
- Individualni efekt (Ecological fallacy):
 - Rezultati dobiveni za pojedine geografske jedinice ne smiju se primjenjivati za pojedince unutar tih jedinica

Hvala na pažnji
